

Oshani Wickramasingha

A: Melbourne, VIC 3125 | M: 0424 159 226 | E: oshi.tharanga@gmail.com

Profile Summary

Business Analyst with 3+ years of experience delivering end-to-end business analysis, quality assurance, process improvement, and data-driven solutions across education, hospitality, healthcare, and telecommunications sectors. Experienced in Agile delivery, stakeholder engagement, and translating business requirements into user stories and functional specifications. Proficient in Jira, Confluence, Power BI, BPMN, and process optimisation, with a strong focus on service delivery, customer outcomes, continuous improvement, and data-driven decision-making.

Areas of Expertise

Stakeholder Engagement & Business Process Optimisation

- **Process Analysis & Design:** Analysed existing Student Partnership workflows, identified process gaps, and redesigned scalable to-be processes for student allocation, project tracking, and testimonial management.
- **Requirements Engineering & Documentation:** Developed business analysis artefacts from scratch due to the absence of existing documentation, translating stakeholder needs into BRDs, process models, and prioritised user stories for Agile delivery.

Business Analysis & Requirements Engineering

- **Requirements Engineering:** Led end-to-end requirements elicitation, documentation, and validation for a web-based proposal management system.
- **UAT and Delivery Support:** Developed test cases and coordinated UAT, enabling accurate project status tracking and faster project allocation decisions at Student Partnerships.

Business Intelligence and Performance Reporting

- **KPI Definition & Reporting:** Defined operational KPIs and built Power BI dashboards across hotel management, student administration, sales performance, and healthcare operations.
- **Decision Enablement:** Improved visibility into occupancy, workforce utilisation, and performance metrics, accelerating data-driven decisions by 25%.

Professional Experience

Business Analyst – Quest Apartments

Jan 2023 - May 2026

- Collaborated with property managers, operational teams, and product owners to elicit and validate business requirements, translating them into functional specifications, user stories, and acceptance criteria aligned with Agile delivery frameworks.
- Conducted end-to-end analysis of apartment management processes, including property onboarding, owner management, tenant lifecycle, bookings, maintenance workflows, rental payments, and occupancy management, identifying automation opportunities and future-state improvements.
- Translated business requirements into clear functional specifications and user stories aligned with delivery.
- Gathered reporting requirements from apartment owners and property managers and translated them into Power BI dashboards that improved visibility into occupancy rates, booking performance, maintenance status, rental revenue, and owner portfolio performance.
- Improved overall operational efficiency by 60%, reduced rework by 65%, and increased decision-making speed by 75%.

Teaching Assistant (Business Analysis) - Swinburne University

Jan 2022 - Dec 2023

- Acted as a unit coordinator for business analysis and process modelling subjects, supporting students in developing core analytical skills through structured workshops, real-world case studies, and requirements analysis exercises.
- Simplified complex BA concepts into clear, practical learning outcomes to enhance knowledge retention and application.

Business Analyst - Student Partnerships

Mar 2021 - Aug 2021

- Led end-to-end business analysis by facilitating stakeholder interviews and workshops, and mapping undocumented student allocation and engagement workflows using BPMN, to identify process gaps and automation opportunities.
- Translated business requirements into BRDs, process models, and 20+ user stories with acceptance criteria, enabling structured Agile backlog refinement and sprint planning.
- Designed and implemented Airtable-based solutions and low-code automation for project allocation, reporting, and performance tracking, reducing manual processes by ~75%.

Quality Assurance Engineer - Virtusa (MDS Global, Aviva, Seniorlink)

Feb 2017 - Dec 2018

- Executed high-priority production releases across global client platforms, supporting defect management, release support, and production stability.
- Executed 3,000+ test cases, improved defect detection efficiency by 8%, and reduced production defects by 40% through quality process improvement.
- Designed and executed functional, regression, UI, API, and UAT test cases to ensure solutions met business requirements and quality standards.
- Collaborated with business stakeholders, developers, and product teams to analyse business requirements, clarify functional specifications, and ensure solutions met business and quality objectives across telecommunications, healthcare, and insurance projects.
- Validated API functionality using SoapUI, ensuring data accuracy and reliable system behavior across enterprise platforms.

Core Competencies

- | | | |
|-----------------------------|------------------------------|-----------------------------|
| - Requirement Elicitation | - Stakeholder Management | - Business Process Analysis |
| - ICT system analysis | - Requirements Documentation | - Agile & Scrum |
| - Data Analysis & Reporting | - UAT | - Continuous Improvement |

Education

- Master of Information Technology (Swinburne University of Technology - VIC) - GPA: 3.5 / 4.0 | 2021
- Bachelor of Information Technology (Honours) (Sri Lanka Institute of Information Technology - Sri Lanka) GPA: 3.5 / 4.0 | 2017

Certifications

- Certification of Capability in Business Analysis (CCBA) - Expected 2026
- Microsoft Power Apps Mastery - 2025
- Advanced Certified Scrum Product Owner (ACSPO) - 2024
- Certified Scrum Product Owner (CSPO) - 2023
- Certified Scrum Master (CSM) - 2022
